

Pediatric Intensive Care Unit

Important information

Visiting rules

Parents can visit the paediatric intensive care unit at any time, while healthy siblings can have a daily visit in the presence of their parents. All other visits are only possible in consultation with the staff in charge.

There are several patients in the same room. In special situations (for example, admissions & emergencies) you may be asked to leave the room and wait in the parents' lounge.

A maximum of two people are allowed per patient bed at the same time (in the case of multiples, a maximum of three people), of whom one parent must be present at a time.

If relatives or siblings are suffering from an infectious disease, they are not allowed to enter the ward until they have recovered. Infectious diseases are, for example: Cough, fever, sore throat, earache, cold, vomiting, cold sores, eye infections or diarrhoea.

Medical information

Medical information about the patient will only be given to the patient's parents or legal guardian. Parents should be able to be with their children without restrictions. That is why we refrain from sending parents out of the room during rounds / reports. If you have any objections, please contact the nursing staff.

Visitor facilities

Apart from the patient's room, the ICU also has a dedicated room for parents to use, equipped with a fridge, microwave and kettle. There is also a quiet room on the second floor for resting.

Hygiene

Before entering the ICU, visitors are required to remove any jackets, rings and wristwatches and lock them up, along with any handbags, in the lockers provided. They should then wash their hands and sanitise them.
