

# Breastfeeding advice at UKBB

Professional advice on breastfeeding can be very helpful in ensuring a successful technique and optimal supply of breastmilk. A counselling service is available for mothers with babies in neonatal wards.

## **Billing**

Breastfeeding consultations are billed through the mother's health insurance, so the mother's signature is required for each consultation. Your health insurance will cover the first three consultations in full.

## **Availability**

The service is available every Monday and Friday, as well as every second and fourth Wednesday in the month. To book a consultation, please contact the primary nurse looking after your baby.
